PROFESSIONAL SUMMARY

Full-stack software engineer with 6+ years of experience building and maintaining web applications using PHP, Laravel, Symfony, and Vue.js, complemented by an MSc in Data Science (Merit). Comfortable working across the entire stack, from database design and REST API development through to responsive front-end interfaces, and experienced with cloud infrastructure (AWS, Docker, Kubernetes) and MySQL. Background includes senior contract work delivering internal retail platforms for Apple Inc. I enjoy both building new features from scratch and taking ownership of existing systems, including migrating legacy applications to modern, maintainable stacks. I've worked in small, cross-functional teams as well as larger organisations, and I'm comfortable adapting quickly to new codebases and technical requirements.

LANGUAGES AND TECHNOLOGIES

Languages (PHP, JavaScript, Python) | Frameworks (Laravel, Vue.js, Symfony, AngularJS) | Libraries/Tools (jQuery, HTML, CSS, Bootstrap, Vuetify, Vuex, VeeValidate) | Testing (PHPUnit, Pest) | IDEs (PhpStorm, VS Code) | CMS/Others (MySQL, SCRUM/Agile, WordPress, REST APIs) | DevOps/Platforms (AWS, Docker, Git, GitHub, Kubernetes, Jira)

EXPERIENCE

Universal Web Design - Colchester, UK

August 2026 - Present

Web Designer

- Design and build responsive websites in WordPress, customising themes, templates, and page layouts with Elementor and WPBakery to meet client and business requirements.
- Install, configure, and maintain WordPress plugins, and manage ongoing site updates, backups, and security.
- Implement on-page SEO best practices and performance optimisations, improving site speed and mobile usability.
- Troubleshoot and resolve website issues while managing multiple concurrent projects, working closely with the team to deliver new features and UX improvements.
- Provide ongoing customer service and support, acting as the direct point of contact for clients and handling queries, updates, and requests throughout each project.

Softzino Technologies - Dhaka, Bangladesh

March 2022 - January 2024

Senior Software Engineer (Independent Contractor at Apple Inc.)

- Led the development and enhancement of Apple RDDM Portal (Laravel, Vue.js, Docker, AWS, Kubernetes), used by 100,000+ internal and retailer-side staff, improving content management efficiency for internal and retailer-side usage.
- Revamped multiple application modules and implemented HTML accessibility across all components, enhancing user experience and reducing load times by 30%.
- Wrote and maintained automated test suites using PHPUnit and Pest, improving code reliability and reducing regressions across releases.
- Integrated new dashboard widgets and features to increase operational efficiency.
- Mentored 6+ junior developers, accelerated their onboarding process and helped them integrate into the team.
- Contributed to the development of the Store Audit module in Apple ART project to monitor the business's overall performance across 530+ retail stores worldwide, ensuring it meets operational standards.

Freelance (Fiverr & Direct Clients) - Remote

October 2021 - Present

Freelance Software Engineer

- Deliver PHP/Laravel builds, WordPress sites and third-party API integrations for clients across Belgium and internationally, working directly with clients from requirements through launch.
- Built and maintained recruitment/job-matching platforms for Belgian clients Sixie (sixie.be) and CTRL-F (ctrl-f.be), including multilingual WordPress sites with custom vacancy/candidate-matching functionality.

Tikweb ApS - Aarhus, Denmark

April 2020 - February 2022

Software Engineer

- Assisted small businesses in transforming their processes to online platforms, enabling digital transformation and increasing operational efficiency.

- Built modularized versions of core applications, enabling solo and guest user support, expanding the user base by 25%.
- Designed and implemented a performance monitoring tool combining Lumen and Elasticsearch, reducing system bottlenecks and improving load times by 40%.
- Collaborated cross-functionally using Agile methodologies in Jira to deliver new features and fixes.

Skylark Soft Limited - Dhaka, Bangladesh

January 2020 - March 2020

Software Engineer

- Developed ERP and production tracking modules using Laravel and jQuery, improving production visibility across the factory floor operations.
- Migrated legacy HR software to modern stack (Vue.js, Laravel), reducing maintenance issues.
- Worked closely with the support team to address client feedback promptly.

Opcodespace - Dhaka, Bangladesh

January 2018 - December 2019

Web Developer

- Built robust web applications and RESTful APIs from scratch using PHP, Laravel, and Lumen
- Integrated third-party marketing, accounting and payment APIs and SDKs into management applications. e.g., Infusionsoft, Zoho, Xero, PayPal, EasyCollect, QuickBooks.

EDUCATION

London South Bank University -

September 2023 - October 2024

MSc in Data Science (Merit)

- Relevant Modules: Machine Learning, Data Mining & Analysis, Statistical Analysis & Research Methods, Data Management, Cyber Threats & Countermeasures, Future Internet Technologies.
- Dissertation: "Machine Learning for Email Security with a Focus on Spam Detection" - Evaluated supervised ML classifiers (Naive Bayes, SVM, Random Forest) in Python, achieving optimal Precision through decision-threshold tuning to mitigate cyber risk.

TRAINING

Software Processes and Agile Practices -

March 2022

University of Alberta (Coursera)

Agile Software Development -

April 2021

University of Minnesota (Coursera)

PROJECTS

Apple RDDM Portal

(Laravel, Vue.js, UIKit, Docker, Kubernetes, AWS)

Advanced content management platform handling posts, events, job listings, and employee onboarding. Implemented responsive design principles provided by Apple and optimized for 99.9% uptime.

Backstage Apple Retail Tool

(Laravel, Vue.js, UIKit)

Global retailer platform managing newsletters, training modules, FAQs, mentor programs, alert systems, inventory management, and store operations. Supports 10,000+ daily users across multiple time zones.

TrapME

(Laravel, Vue.js, Vuetify)

IoT-integrated remote rodent monitoring system managing multi-level user access, device fleet management, real-time data visualization, and automated alert notifications.

ActionPlanner

(Symfony, Angular.js, TypeScript)

Enterprise execution excellence platform for strategic planning and team coordination. Scaled to support 160+ companies with complex cross-border operations and real-time reporting requirements.
